DANIYAL ABID

Software Engineer

+92 335 0070073 — Daniyala714@gmail.com — LinkedIn — Islamabad

Summary

Experienced software engineer with a focus on frontend development, AI integration, and scalable web applications. Proficient in full-stack web development, integrating APIs, managing 3D visualizations, and building microservices. Passionate about tackling technical challenges and automating workflows using modern technologies such as Next.js, React, Python, Django, FastAPI, Redis, and Three.js.

Experience

Software Engineer May 2025 – Present

IMARAT Group of Companies, Islamabad

- Developed and maintained frontend systems for IMARAT's AI platforms **HouseGen** and **UrbanGen** for architectural and urban design automation.
- Built and integrated APIs using **FastAPI, Django, and Next.js** to enable real-time communication between frontend and backend services.
- Implemented **Three.js-based 3D visualization** for urban planning in UrbanGen, enabling interactive exploration of generated city layouts.
- Developed **Three.js interior visualization** for HouseGen with accurate spatial rendering and dynamic asset placement.
- Integrated **map-based workflows** by converting latitude and longitude data into Three.js coordinate systems for accurate spatial visualization.
- Designed **Redis-based queueing pipelines** in HouseGen for asynchronous rendering and AI processing tasks.
- Implemented **S3 image proxy pipelines** to efficiently deliver generated assets to the frontend.
- Developed interactive **React-based editing interfaces** for floorplans and urban layouts.
- Integrated **SAM-based segmentation and diffusion-based inpainting workflows** for AI-assisted design editing.
- Designed **ComfyUI rendering workflows** for generating urban environment renders directly from UrbanGen Three.js visualization outputs.
- Implemented **ComfyUI pipeline integration** with backend APIs to automate rendering requests from the UrbanGen visualization interface.

Junior Frontend Developer Jun 2023 – Sep 2023

Brainhub Labs, Islamabad

- Integrated RESTful APIs and collaborated with backend teams to resolve technical issues.
- Reviewed peer code and resolved version control conflicts using Git pull requests.
- Developed responsive UI components based on Figma designs.
- Worked independently under pressure and adapted to evolving project requirements.
- Built static business websites with custom animations (Dental Clinics, Pet Services, etc.).

Education

BS Computer Science Oct 2020 – Jul 2024

Szabist University, Islamabad

Relevant Coursework:

- Web Development
- Android Development

Projects

Proctoring Network (MERN Stack) Oct 2023 – Jul 2024
Szabist University

A secure platform for remote exam proctoring using AI, computer vision, and biometric authentication.

Key Features:

- Face Verification
- Voice Analyzer
- Test Generator and Automated Analysis
- Developer Tools Surveillance
- Multiple Tab Monitoring

Maxify Marketing Website (React) Jun 2023 – Aug 2023
A marketing website built with React to provide a dynamic, responsive, and user-friendly platform for the Maxify marketing campaign.

Key Features:

- Designed and implemented the UI with modern React components.
- Integrated with backend APIs to pull live data and update the marketing materials dynamically.
- Optimized for mobile and desktop platforms using responsive design techniques.
- Enhanced the frontend with interactive features such as carousels, modals, and forms for lead capture.

Skills

Programming Languages: C++, Java, JavaScript
Frontend: React, Next.js, HTML, HTML5, CSS, Bootstrap, Three.js
Backend: Python, Django, FastAPI, PostgreSQL
Database: PostgreSQL, MySQL
Tools: Git, GitHub, Visual Studio Code, Android Studio, Cisco Packet Tracer, Redis
3D Visualization: Three.js, Mapbox
Others: RESTful API Integration, Docker, S3 Proxy Integration, SAM Segmentation, Inpainting

Certifications

- React.js Basics – Great Learning
- Microsoft Learn Student Ambassador

Languages

English (Proficient)
Urdu (Native)
